SUMMARY

Frontend Developer and aspiring IT Programmer with hands-on experience in building role-based web systems using React and Next.js. Experienced in developing dashboard interfaces with authentication mechanisms, REST API integration, and modular component architecture. Focused on delivering scalable and maintainable web solutions for institutional and organizational systems.

EDUCATION

Bachelor of Informatics Engineering (6th Semester)
Institut Teknologi Nasional Bandung (ITENAS) June 2023 - Present
GPA: 3.15

TECHNICAL SKILLS

Frontend Development
React.js, Next.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap, React Router
System & API Integration
REST API Integration (Axios), Authentication Flow, Protected Routes, Role-Based Access Control, CRUD Implementation
UI/UX
Figma, Wireframing, Prototyping, Usability Testing, Design Thinking
Tools
Git, GitHub, VS Code

PROJECT EXPERIENCE

Admin Dashboard System (React-Based Web Application)
Developed a role-based dashboard system with authentication and user access control (Admin & Client roles). Implemented login validation, protected routing, and REST API integration for dynamic data management. Structured component hierarchy and implemented conditional rendering logic to handle multi-role interface behavior.
Key Features:

- Authentication flow with access control
- Role-based UI rendering
- CRUD operations integrated with API
- Responsive interface across devices

Web Portfolio (Deployed)
Designed and developed a responsive portfolio website using React with modular component architecture and optimized layout for both desktop and mobile environments.
Live: https://faisalllar.github.io/web-portofolio/

E-Commerce Web Application (Team Project)
Collaborated in developing a fullstack e-commerce system with authentication and cart management logic. Contributed to frontend development and API integration.
Key Features:

- User authentication system
- Cart and product management logic
- API-based data handling

ORGANIZATIONAL EXPERIENCE

Public Relations & Licensing Division Committee Member
Informatics Student Association (HMIF) – ITENAS

- Managed external communication and licensing coordination
- Collaborated in event planning and execution

CERTIFICATIONS & TRAINING

UI/UX Training Program – DSF 48.0
UI/UX Designer – Participate Class Batch 2.0
Fundamentals of Deep Learning – NVIDIA
Youth Inter-Action Exploration Program – South Korea Chapter
